

MEASURE K

Hydration Station Community Action Grant

Grant Details & Purpose

- Community Applicants: Sofia Ramirez & Maury Treleven
- Matching Partner: GUSD
 - Plumbing, Labor & Filter Replacement
- Purpose of Grant:
 - Provide a healthful, chilled, and filtered beverage alternative to sugary drinks
 - Eliminate single-use beverage container generation
 - Sets a precedent for future infrastructure upgrades
- Locations:
 - La Gloria School Cafeteria (installed)
 - Fairview School common/patio area (installed)
 - Gonzales High School gymnasium exterior (installed before end of school year)
 - Fairview School/City of Gonzales Joint Use Gymnasium (installed before end of school year)

Anticipated Results

- Unit co-sponsored by GHS Class of 2015 & GUSD (Gonzales High School)
 - Total single-use beverage container displacement: 26,308 units
 - Average annual single-use beverage container displacement: 8,769 units
- By the end of this school year, there will be 5 units installed
 - Estimated displacement of 43,845 single-use beverage containers
 - Anticipate higher results for these locations due to better visibility and sports activity
- Once all units are installed, we can survey students, staff & athletes at each site to get feedback on the units
- G3 can include an updated count of containers displaced at these sites as part of the program's annual report to the community
