Small town, big heart! ~ ¡Pueblo chico, corazón grande!

Notice of Availability of a Draft EIR

Project Title: Vista Lucia Project – Vista Lucia Specific Plan & Tentative Map for Neighborhood #1
State Clearinghouse Number: 2020039056

Project Location (Specific): Assessor Parcel Numbers 223-031-024, -025, and -027, bound by Fanoe Road to the west, Associated Lane to the north, Iverson Road to the east, and a large agricultural property to the south in unincorporated Monterey County, within the City of Gonzales Sphere of Influence

Project Location (Town): Gonzales

Project Location (County): Monterey

Description of Nature, Purpose, and Beneficiaries of Project: The proposed project would facilitate the development of a portion of the City's growth area and has been anticipated since the General Plan was adopted in 2010. The requested entitlements include a general plan amendment (specific plan), pre-zoning, annexation, and the first of several anticipated tentative maps. Up to 3,498 dwelling units at various densities; 96,000 square feet of local serving retail (mixed use), 79 acres of parks, promenades, and village greens; two elementary and one middle school on a total of 48 acres; and roads, stormwater detention, agricultural buffers, and other open space comprise the planned improvements/uses. Individual future projects that implement the specific plan will be subject to CEQA review that may be streamlined based on CEQA Guidelines sections 15183 and/or 15182.

Environmental Impacts: The proposed project would have significant aesthetic, agricultural resource, air quality, biological, cultural resource, greenhouse gas, hazardous materials, hydrology and water quality, and transportation impacts. A range of mitigation measures are proposed to substantially lessen or avoid the significance of each impact. However, mitigation measures are insufficient to reduce four of the significant impacts to less than significant: 1) aesthetics (visual character and glare); 2) conversion of important farmland to non-agricultural use; 3) generation of volatile organic compound criteria air emissions; and 4) generation of vehicle miles traveled from the residential component of the project. These impacts are significant and unavoidable.

Lead Agency: City of Gonzales

Department: Community Development

Address Where Copy of EIR is Available: Gonzales City Hall, 147 4th Street, Gonzales, CA 93926 and Gonzales Public Library, 851 5th Street, Gonzales, CA 93926.
