01 / WHAT IS \$GCC

THE COIN, IN ONE PARAGRAPH

\$GCC is the Official Gonzales California Coin, a Solana memecoin launched on pump.fun for the city of Gonzales. 100% of the creator fees generated from trading are directed to a public creator fee wallet dedicated to funding **The Gonzales Way**: the community's framework for raising happy, healthy, successful children through love, care, and connection. Every trade becomes fuel for that mission.

ENDORSED BY

Mayor Jose L. Rios

Mayor of Gonzales, California

02 / THE GONZALES WAY

THE CAUSE THE COIN FUNDS

In Gonzales, California, an entire town has quietly committed itself to one idea: no child should grow up alone. **The Gonzales Way** is the framework the city, schools, and families built together to make sure every kid in town has someone who shows up for them. It powers mentorship programs, after-school activities, family support, and the small everyday things that turn a childhood around.

Every time \$GCC changes hands, a piece of that trade flows straight into this work. Buy a bag, back a kid. It really is that simple.

“The Gonzales Way is the way we raise happy, healthy, successful children in Gonzales, California. It comes down to this: Love, Care, and Connect.”

LOVE

A child who feels loved grows up strong and confident.

CARE

A child needs attention, protection, and guidance.

CONNECT

A child needs to be linked to people and opportunities.

05 / DISCLAIMER

READ THIS

\$GCC is a memecoin. It is not an investment, security, or financial product. It carries no intrinsic value, no yield, and no guarantee of appreciation. Memecoin prices are volatile and can drop to zero. Only participate with funds you can afford to lose. The amount of SOL that reaches The Gonzales Way depends entirely on trading activity; there is no fixed payout schedule or target. Crypto regulation and tax treatment vary by jurisdiction. You are responsible for compliance where you live.
